Handout: Retrieval practice study (sample)

This is a sample handout used to demonstrate that text inside attached PDFs is searchable.

Conditions

1. Study, study, study, study (rereading only)
2. Study, test, test, test (retrieval practice)

After one week, the retrieval group recalled substantially more. One proposed mechanism is that effortful recall strengthens consolidation in the hippocampus and makes memories easier to reach later.

Search tip: search your slip-box for **hippocampus** to find the note this PDF is attached to.
